Margaret Keane
Senior Archaeologist
National Monuments Service

FISH – Heirnet Meeting
Belfast
October 2019
Department Statement of Strategy

Goal B – To conserve, manage and present our heritage in compliance with legal obligations, both for its intrinsic value and as a support to economic renewal and sustainable employment.

National Monuments Service Mission Statement

- To protect, conserve and manage our archaeological heritage through the provision of an appropriate administrative and legislative framework under the National Monuments Acts
- To create increased public awareness and appreciation of the value and importance of Ireland’s archaeological heritage
- To promote and provide information on the quality of our archaeological heritage as a support and stimulus for inward investment and cultural tourism.
National Monuments Service

- The National Monuments Service advises the Minister for Culture, Heritage and the Gaeltacht on legislative and policy issues relating to the archaeological heritage of Ireland.
- Maintenance of the Record of Monuments and Places (RMP) and Sites and Monuments Record (SMR) and the Wreck Inventory of Ireland Database (WIID).
- Implementation of legislation in relation to the protection of sites and monuments.
- Regulation of archaeological excavations, use of detection devices for archaeological purposes and diving on historic wrecks.
- Advise planning authorities on development proposals that might have an impact on archaeology.
- Implement the World Heritage Convention in Ireland.
1930 National Monuments Act
NMAC proposed the setting out of an archaeological survey of the country – estimated 50,000 approved by Ernest Blythe
1. Rapid paper survey looking at published sources
2. Inspection and recording
3. Detailed recording and excavation where required.
Primarily to assist in the selection of monuments for preservation

Commenced 1933, by 1940 2,000 records made
1940 Publication of the Preliminary Survey of Ancient Monuments in N.I. a fillip as did the establishment of the Archaeological Survey of N.I. in 1950.

Sean P Ó’Riordáin

“We in the twenty-six counties must ask ourselves if we are content to lag disgracefully behind in this task”.

Negotiations between the NMAC and the OPW continued with no resolution in sight
Concerns about the format - Universities wanted research and excavation as priorities, the OPW wanted grading for the purposes of protection as a priority – economies of scale and staff proving difficult for the civil service to understand.
1963 A Director and two archaeological investigators employed to locate, examine, classify and record the nature and extent of all monuments and traces of monuments from prehistory to the present times

(PD) Established the Archaeological Survey of Ireland later to be assisted by 2 archaeological surveyors

By 1973 counties Louth, Monaghan and Meath had been completed, as well as parts of Cavan and Westmeath.

However, lack of publication and increasing impacts on the survival of monuments was proving that protection of monuments was not being achieved so 1983 SMR office was set up.

Below right: John Mahony, Chairman of the Commissioners of Public Works.
The Commissioners shall establish and maintain a record of monuments and places where they believe there are monuments and the record shall be comprised of a list of monuments and such places and a map or maps showing each monument and such place in respect of each county in the State.

National Monuments Amendment Act 1994
Section 12

1995-1998 RMP’s Published
The Archaeological Survey of Ireland - People and Work Locations
any artificial or partly artificial building, structure or erection or group of such buildings, structures or erections
any cave, stone or other natural product, whether or not forming part of the ground, that has been artificially carved, sculptured or worked upon or which (where it does not form part of the place where it is) appears to have been purposely put or arranged in position
any, or any part of any, prehistoric or ancient tomb
• grave or burial deposit,
• ritual, industrial or habitation site

But does not include any building… used habitually for ecclesiastical purposes

any place comprising the remains or traces of any such building, structure or erection, any such cave, stone or natural product or any such tomb, grave, burial deposit or ritual, industrial or habitation site,
The Wreck Viewer - Wreck Inventory of Ireland Database (WIID), which holds information on over 18,000 known and potential wreck sites in both the waters off the Irish coast and in our internal waterways. Approximately 4,000 of the recorded wrecks have precise locations situated on land or in the territorial waters of the State.
“historic monument” includes a prehistoric monument and any monument associated with the commercial, cultural, economic, industrial, military, religious or social history of the place where it is situated or of the country and also includes all monuments in existence before 1700 A.D. or such later date as the Minister may appoint by regulations;

Classes and Scope Notes

Class List Definitions

Aimshouse
A house endowed by a benefactor devoted to the shelter of the poor. These date from the late medieval period (c. 1400 to the 16th century AD onwards).

Remarks:
Archaeological Survey of Ireland (August 2006): All pre-
1700 AD known examples of this class come within the remit of
the Archaeological Survey of Ireland. However, post-
1700 AD examples already in the database will remain on record but will
not be included in the RMP or in the inventory series.

Power/Powerhouse (August 2006): Historic Towns

Altar
A structure of stone in the form of a table or block used as the focus for a religious ritual, but not part of a church. This class
term is also used for features named ‘Altar’ on Ordnance Survey maps where there is no surviving visible trace above
ground. These can be of any date from prehistoric onwards. See also Mass-rock.

Remarks:
Archaeological Survey of Ireland (February 2006): All pre-
1700 AD known examples of this class come within the remit of
the Archaeological Survey of Ireland. However, post-1700 AD examples already in the database will remain on record but will
not be included in the RMP or in the inventory series. Altars found in a church are not recorded separately. An altar from a
church but found away from it is to be classified as an ‘Architectural feature’.

Inventory chapter (February 2006): Ecclesiastical Monuments or Medieval and Post-medieval Ritual Monuments
Zone Radius: 20

Anomalous stone group
A group of stones, usually standing, which cannot be classified as any other known archaeological monument type on
present evidence. They may be all that remains of a partially destroyed or obscured archaeological monument
which may date to any period from prehistoric onwards.

Remarks:
Archaeological Survey of Ireland (August 2006): All pre-
1700 AD known examples of this class come within the remit of
the Archaeological Survey of Ireland. However, post-
1700 AD examples already in the database will remain on record but will
not be included in the RMP or in the inventory series.

461 Classes
50 Classes to the left account for approx. 85% of examples

Flat System but covering classifications
barrows,
caimns,
crosses,
houses,
kilns,
megalithic tombs,
mills,
mines,
religious houses,
roads,
stone circles,
stone sculptures,

The Summer of 2018.....
Monuments & Archaeological Heritage Bill (2020?)

The Monuments and Archaeological Heritage Bill will repeal the National Monuments Acts 1930-2014 and related legislation and replace it with modern legislation. The objective is to have a modern, efficient and effective legislative code all contained between the covers of a single Act.

Pre-legislative parliamentary scrutiny to commence (all things going well).

Key Aspects:
• Single Register of Monuments.
• 2 Levels of protection – Special and General.
• Automatic protection of newly-discovered monuments (which does not currently exist).
• Integrated Licence System.
• Measures to allow ratification of key international conventions in heritage protection.
• Will address gaps and weaknesses including some identified in the Courts.
